

Gentiva Rehab Without Walls delivers comprehensive, non-facility based neurorehabilitation to clients with traumatic brain injury (TBI), spinal cord injuries and other diagnoses. Approximately 1.5 million Americans sustain a traumatic brain injury each year<sup>1</sup>. These injuries have short-and long-term effects on individuals and their families, and the cost of care is significant. This groundbreaking non-facility based program is changing lives by delivering durable outcomes to clients wherever life happens — whether that’s the home, school, community or workplace. The clinical and financial value of this revolutionary program is demonstrated by a recent outcomes collection of 622 Gentiva Rehab Without Walls clients.

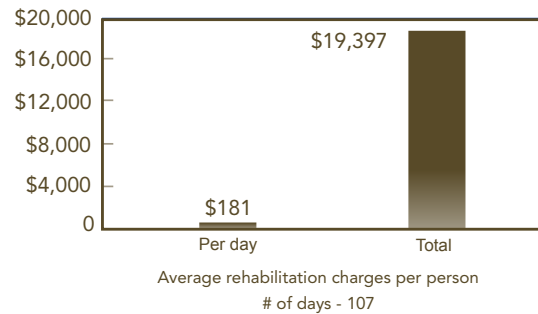

Gentiva rehab without walls can help control overwhelming TBI costs:

TBI costs continue to rise at acute rehab facilities...

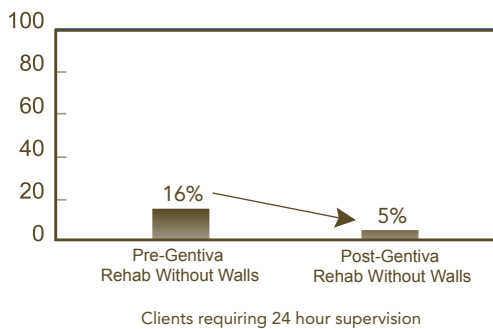

But Gentiva Rehab Without Walls offers a cost-effective alternative...

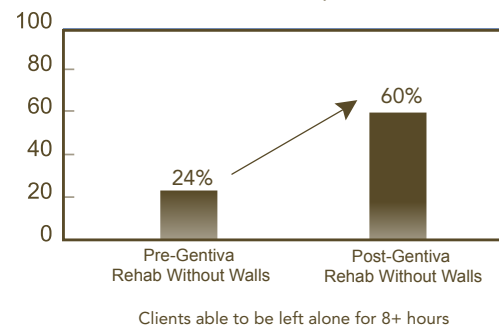

Gentiva rehab without walls significantly increases client independence:

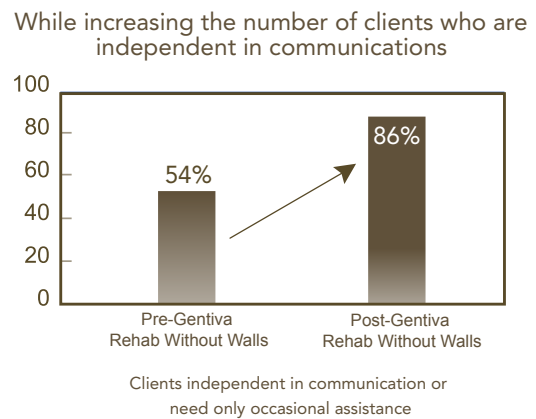

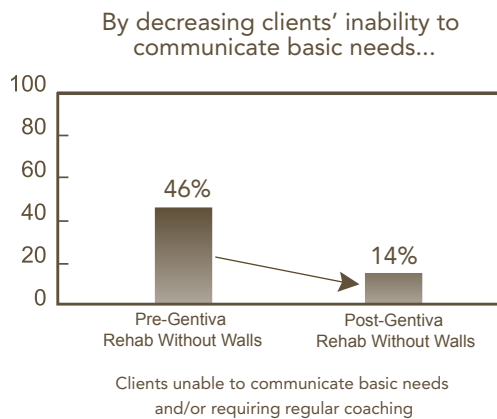

By decreasing the need for 24 hour supervision...

While increasing the number of clients who are self-reliant for extended periods of time.
